

MTD90 2-Way Radio & FM Receiver

Major Tech's MTD90, a versatile 2-Way Radio & FM Receiver designed for optimal communication and convenience. With an impressive array of features, this radio is equipped with 199 channels, ensuring reliable and clear communication. The VOX Hands-Free functionality adds an extra layer of convenience, allowing users to communicate effortlessly. The MTD90 boasts a built-in FM radio receiver, providing additional entertainment options. The LCD display with seven backlit colours enhances visibility and customization. With 34 menu options, including DCS and CTCSS indicators, frequency space setting, and battery-saving features, this radio is designed to meet diverse communication needs. The LED display simplifies operation, and the keypad can be locked manually or automatically. Additional features such as emergency calling channels, offset shift direct, and memory channel settings contribute to the radio's versatility. The MTD90 is sold as individual units and comes with accessories, including a belt clip, battery, battery charger, and earpiece, making it a comprehensive solution for effective communication in various settings.
