SFP-20C
Solar LED Floodlight

The SFP-20C is a solar LED floodlight that ensures brilliant illumination with a high lumen output of 1200lm. It's 6500K colour temperature ensures vibrant lighting. During the day, the floodlight charges under the sun's rays. At night, the solar panel identifies the absence of light and the PIR becomes active. When someone enters the coverage area, the PIR sensor triggers the light to come on. The light stays lit for as long as the person remains within the coverage area; when the person exits the area for 25 seconds, the light switches off automatically. The solar floodlight comes with a replaceable battery to ensure the maximum lifespan from the LED's and fitting.

Features

- 1200 Lumens
- 10 Watt
- 5V / 1W Solar Power Panel
- Battery Capacity: 2 600mAh
- 3.7V Lithium Battery
- 4 Meter PIR Detection
- 120º Beam Angle
- IP54 Waterproof and Dust Proof

Product Specification

Function	Range
LED Power	10W
Lumen Efficiency	120lm/W
LED Lumen	1200lm
Battery Type	Replaceable 18650 Li-Ion, 1800mAh
Battery Working Time	Activation Dependant
Beam Angle	120°
IP Grade	IP65
PIR Sensor Range	5m Max
Dimensions	181mm x 33mm x 141mm

1200 Lumen Output

PIR Sensor

Compact A Grade Monocrystalline Silicone Solar Panel
