- 100W LED Floodlight
- 8500 Lumens
- Weight: 1.25kg
- Dimensions: 252 x 182 x 38mm

ALF200NW

- 200W LED Floodlight
- 16000 Lumens
- Weight: 2.83kg
- Dimensions: 397 x 308 x 43mm

With a quick and easy installation process,
these floodlights provide powerful
illumination while saving you time and money

HOW FAST?

STEP 1

Unscrew the cable gland from the base of the floodlight housing and then unscrew the bottom thread-lock sealing nut from the body of the gland. Strip your wire ends to a strip length of 14mm

STEP 2

Feed your prepared wire ends through the thread-lock sealing nut, and then through the bottom of the gland.

STEP 3

Using a screwdriver, press down on the trigger latches of the fast connector block, insert the prepared conductor into the Live, Neutral, and Earth terminals until the insulation is reached, release the trigger to securely lock the conductor in place, and then reattach the cable gland onto the body of the floodlight.

Say goodbye to traditional floodlights and upgrade to
Major Tech's Range of Fast Connect LED Floodlights today!
